C3 Metals

Focused on creating substantive value through
the discovery and development of
LARGE COPPER-GOLD DEPOSITS

JAMAICA

Where we believe we will show
the world a new district

17,855 hectares - 100%
9,870 hectares - 50% JV
in Crawl River Fault district

PERU

Known world class
Copper/Gold district

30,000 hectares
in Andahuaylas-Yauri district

Why Copper?

Copper – Growing Demand & Constrained Supply

Growing Demand

Electric vehicles (EVs):

+5x copper vs gas vehicles
~40% of the green copper
demand by 2030

up to 25kg copper
used in charging ports

4.6t Cu/MW
in solar powered
systems

4.7t Cu
in 3MW wind turbines

Up to 0.7kg/kWh
in a lithium-ion battery

Demand Exceeds Supply

The growing copper demand outweighs the global copper supply.

By the end of the decade a significant **supply of new copper production** is needed to fill the supply gap.

Supply Constraint Directly Related to Lack of Investment

Significant capital continues to flee global specialist mining funds

From 2011 to present: MSCI World Mining Index & Van Eck Gold Miners Index **dropped 31% and 60%**
Mining specialist capital dropped **60% in UK and 80% in Canada**

C3 Metals Focused on Building Tonnes with Grades In-line with Current Operating Mines

Operating mines currently have an **average grade of 0.53%¹**

Copper projects **under development** have an **average grade of 0.39%¹**

C3 Metals' CuEq² grades in recent drilling are in line with the average grade of current operating mines

¹ Source: MINING.com

² Copper equivalent (CuEq) calculation is for reporting purposes only and was determined based on $\text{CuEq (\%)} = \text{Cu (\%)} + ((0.7079 \times \text{Au g/t})$ under metal price assumptions of Copper - US\$3.00/lb, Gold - US\$1,800/oz. As the Bellas Gate project is an early-stage exploration project and there is insufficient metallurgical data to allow for estimation of recoveries, porphyry copper-gold recoveries are estimated based on multiple comparable porphyry-style copper-gold deposits (Alumbrera, Batu Hijau, Fish Lake, Mt Milligan, El Pachon, Agua Rica, Cerro Cassle and Skouries) which averaged 90% recovery for copper and 73% for gold.

Our Goals & Objectives

Initial Discovery Goals and Objectives

Initial Discovery Goal

Market value assuming price/lb of Cu in the ground:

Price / lb of Cu in the ground	US\$ Market Cap	C\$ Market Cap at 1.35 FX rate
US\$0.05	US\$110M	C\$148M
US\$0.07	US\$154M	C\$208M
US\$0.10	US\$220M	C\$297M

Discovery Objectives

Delineate 1Mt of contained copper as quickly as possible for as little capital investment as possible with as little equity dilution as possible.

Must achieve this through **safe, environmentally sound, ethical, stake-holder focused, legal mineral exploration.**

If we achieve **Initial Discovery Goal**, move to **PEA stage** while continuing exploration on other prospects.

Inferred	4,005	0.32	0.11	28.3	14.6	

Notes:

1. The Mineral Resource estimate has an effective date of 1 May 2023 and the estimate was prepared using the definitions in CIM Definition Standards (10 May 2014).
2. The CCPS used to calculate the Mineral Resource estimate uses a copper price of \$3.75/lb, a copper recovery of 75%, an open pit mining unit cost of \$2.35/t, processing costs of \$4.66/t and G&A cost of \$1.37/t. The breakeven cut-off grade using these parameters is 0.14% copper.
3. Mineral Resources are reported in relation to a CCPS in order to demonstrate reasonable prospects for eventual economic extraction, as required by the definition of Mineral Resource in NI 43-101; mineralization lying outside of the pit shell is excluded from the Mineral Resource. Potential revenue from gold was not considered for the development of the constraining pit shell; the Mineral Resource estimate is not dependent on recovering gold.
4. The quantity and grade of reported Inferred Mineral Resources in this estimate are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resources as Indicated or Measured Mineral Resources.
5. All figures are rounded to reflect the relative accuracy of the estimate and therefore numbers may not appear to add precisely.
6. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
7. The Mineral Resource estimate is prepared by IMC of Tucson, AZ, under the direction of Michael G. Hester, FAusIMM, a Qualified Person.
